WELCOME TO SEGRO LOGISTICS CENTRE SCHIPHOL THE DIFFERENCE IS...

CENTRAL

SEGRO Logistics Centre Schiphol is a modern flexible 22,000 sq m site where a warehouse is being developed for multi-tenant solutions. A total of over 17,000 sq m of great sustainable real estate with a high-quality design and landscaping that will be BREEAM Excellent certified. This ensures the reduction of carbon footprint and energy costs for our customers.

The sustainable warehouses have a high quality design, are built with sustainable materials and have a BREEAM Excellent certification to ensure the reduction of the carbon footprint and energy costs for our customers.

MULTI MODAL

WELLBEING

The park is situated next to schiphol Amsterdam Airport, combining 1.44 Million tons of cargo with 316 destinations. The location offers easy accessibility by road due to its excellent transport links to the A4 towards The Hague and Rotterdam and the A5 towards the port.

The N201 provides access to Amsterdam airport in less than 10 minutes. The N201 provides access to Amsterdam airport in less than 10 minutes.

Total					9,723 sqm

PROGRESS IS SUPPORTING DEVELOPMENT

SEGRO Logistics Centre Schiphol consists of durable and sustainable space totalling almost 100.000 sq m, built to BREEAM Excellent standards.

A space that is flexible in use and also suitable for a range of industries including manufacturing, logistics, food & beverage, trade, pharmaceutical and airfreight-related logistics activities.

WORKING IN A THRIVING ENVIRONMENT

We are creating a biodiverse landscape where those working on site can relax and recharge in more natural surroundings.

The park consists of communal outdoor spaces which are a fantastic asset for any workplace. Not only does it provide a much-needed break from the work environment, but it also offers a variety of benefits for employees.

The presence of grass, trees, plants, flowers and comfortable furniture creates a peaceful and relaxing environment, allowing employees to recharge and return to work with a clear mind.

This space can also be used for team-building activities, picnics, and other social events, helping to foster a sense of community and improving overall morale.

The warehouse has a newly built Padel track nearby which is an excellent investment for any workplace and can lead to increased productivity, job satisfaction, and employee well-being.

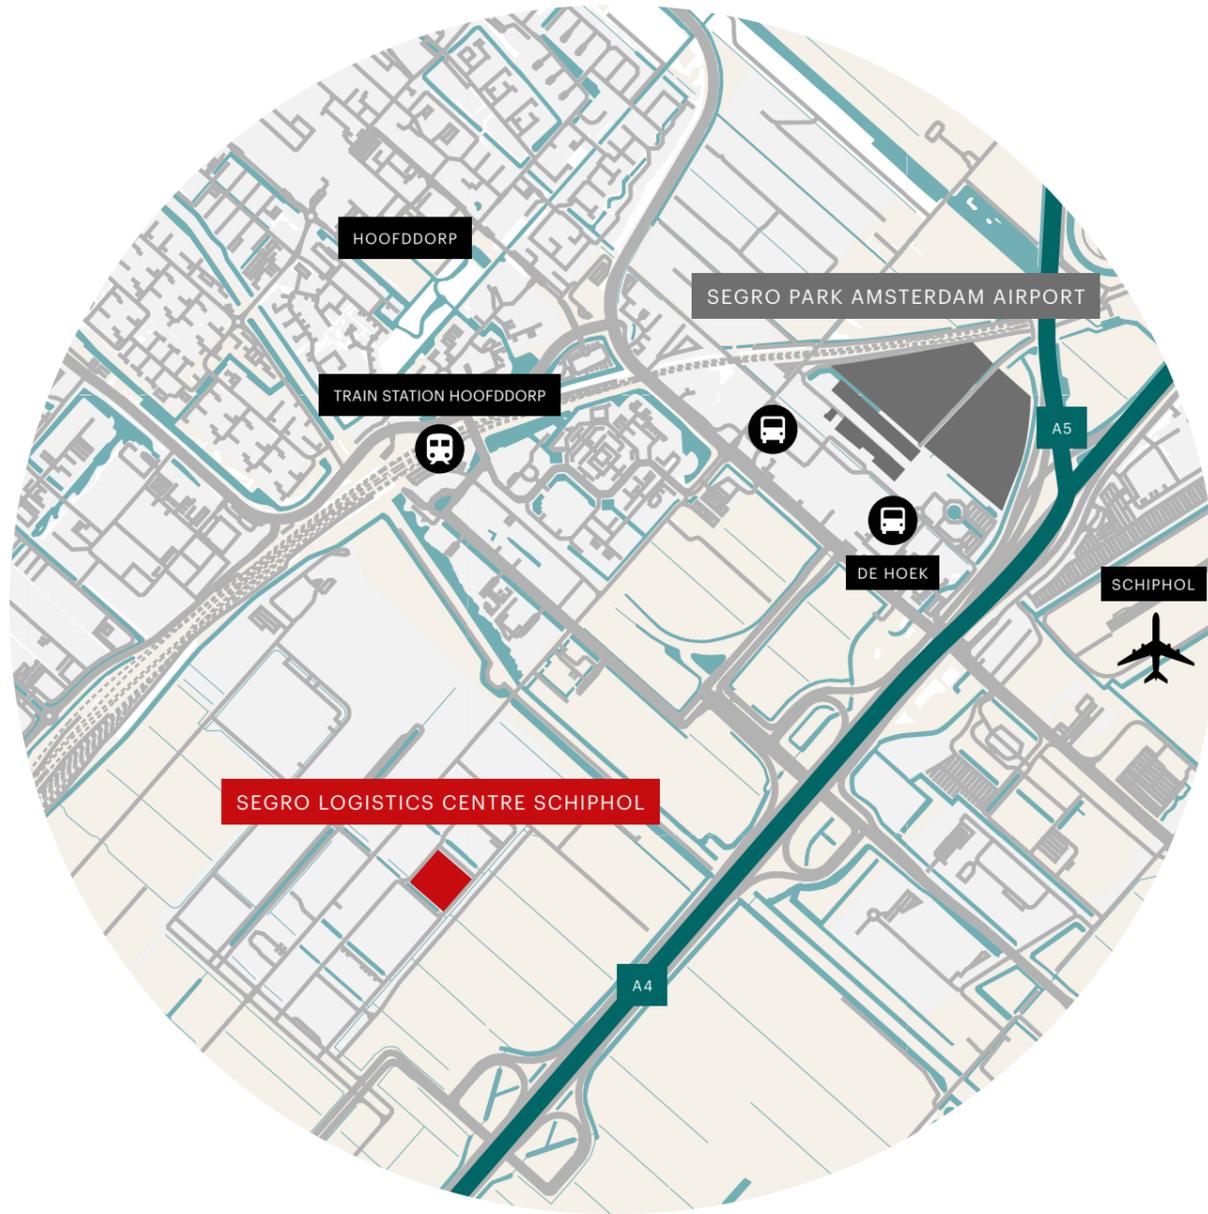

PROGRESS IS A THRIVING ENVIRONMENT

SEGRO has always attached great importance to developing all properties as sustainable as possible. But that does not go far enough for us. Responsible project development means more than optimizing the property itself; the site itself should also be put to the best possible use and create added value for our users and local residents. That's why we add a crucial factor: a healthy ecosystem.

That's why many of our sites, including SEGRO Logistics Centre Schiphol, feature insect hotels, nesting holes for native birds and beehives. With these measures, we are actively supporting species conservation and taking an important step towards maintaining a healthy ecosystem. A great side effect: delicious honey from the roofs of SEGRO Logistics Centre Schiphol.

LOGISTIC HOTSPOT

A SEGRO Logistics Centre Schiphol is perfectly positioned at one of the most attractive logistics hotspots of the Benelux.

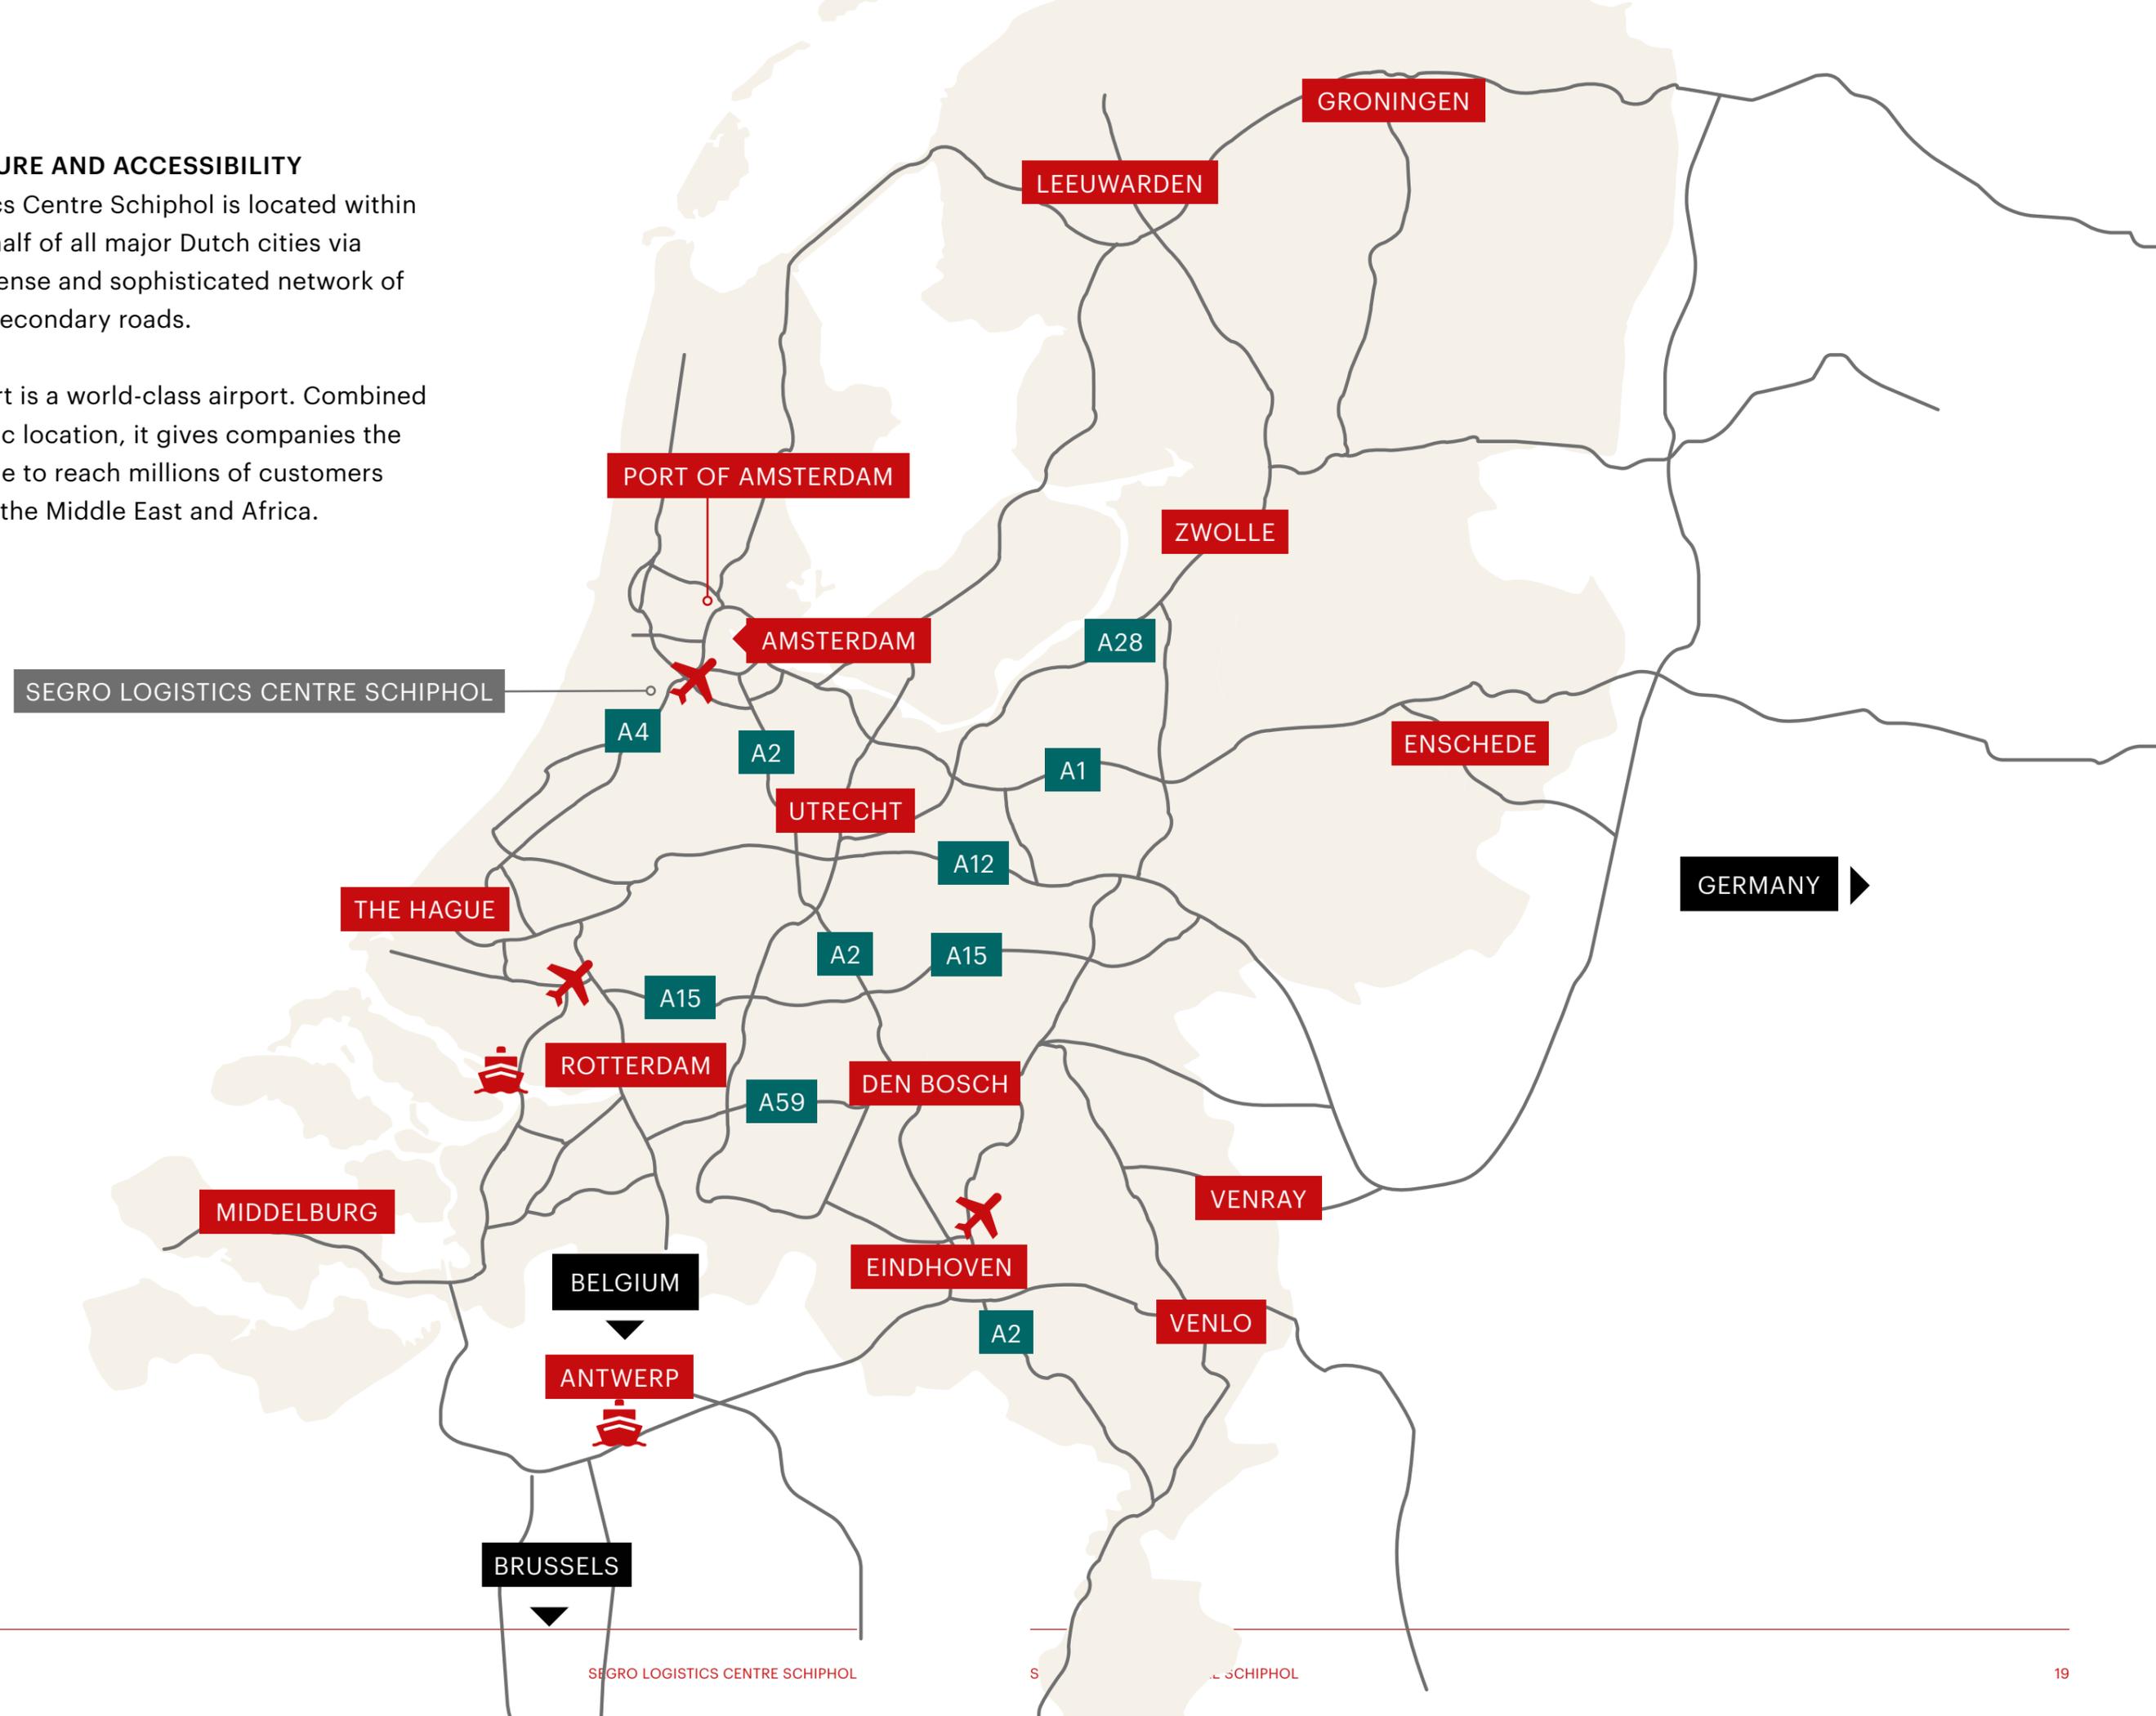

Directly at Amsterdam Airport and only a short distance away from the ports of Rotterdam and Amsterdam, SEGRO Logistics Centre Schiphol is perfectly located to meet the demands of today's logistics businesses.

LOCATION

INFRASTRUCTURE AND ACCESSIBILITY

SEGRO Logistics Centre Schiphol is located within an hour and a half of all major Dutch cities via the country's dense and sophisticated network of highways and secondary roads.

Schiphol Airport is a world-class airport. Combined with its strategic location, it gives companies the significant edge to reach millions of customers across Europe, the Middle East and Africa.

A FIRST CLASS BUSINESS DESTINATION

BEST IN CLASS

Schiphol is a major air gateway to the European continent. A vast cluster of airfreight-related logistics activities has gathered around the airport, mostly on specifically developed business parks. The total stock of modern distribution space in the region amounts to approximately 1 million sq m, which is even more impressive if one takes into account the fact that airfreight handling usually requires less space than standard warehousing.

Moreover, substantial development activity is planned in the wider region in anticipation of airfreight growth and in response to new requirements from carriers and logistics service providers. Among the airport's occupants are the world's largest supplier of wind-industry rotor blades, LM Wind Power and Dutch airline KLM.
