

# We create the space that enables extraordinary things to happen

For further information please contact: Claire Mogford Head of Investor Relations claire.mogford@segro.com

August 2023

We are a UK Real Estate Investment Trust (REIT), listed on the London Stock Exchange and Euronext Paris, and a leading owner, manager and developer of modern warehouses and industrial property. Our assets are located in and around major cities and at key transportation hubs in the UK and across Continental Europe.

Two-thirds of our portfolio is located in Europe's most attractive urban markets where the lack of available land means that supplydemand dynamics are tightest and where long-term growth and returns are therefore likely to be the highest. The remaining one-third of the portfolio comprises clusters of high-quality logistics warehouses situated at key hubs along major transportation corridors.

## **SEGRO** at a glance

#### Key facts (at 30 June 2023)

Total AUM

Total space

# 10.3m sq m

TI

Strong balance sheet

**SEGRO** investment case

Market-leading pan-European operating platform

Restricted land availability limits supply response

**Prime portfolio** of existing assets

**Exceptional land** bank for redevelopment 

RESPONSIBLE **SEGRO** 

### **Our portfolio**

**Big box warehouses** Located in national/regional distribution hubs

**Urban** warehouses Located in or close to major cities

# Well positioned to respond to the acceleration of structural drivers

Driven by mega-trends of urbanisation and technology – change is greatest where these two combine

#### Urbanisation

- Majority of European cities are growing and require additional housing, as well as goods and services to support these larger populations, particularly for 'last-mile' deliveries.
- Industrial land is increasingly being used for residential construction and other uses.
- Land available to meet the need for increased warehouse demand is being eroded.

# Supply chain efficiency and resilience

- Efficient and reliable distribution networks and supply chains are of increasing importance to customers.
- Requires modern well-located warehousing – close to both consumers and a pool of labour.
- Disruption to supply chains caused by the pandemic and the Russian invasion of Ukraine has highlighted the importance of resilience within supply chains.

#### **Digitalisation of our society** (and resultant changes in consumer behaviour)

- Increased e-commerce penetration across Europe has led to retailers needing to adapt their distribution networks.
- Greater use of data (by both businesses and consumers) has led to increased demand for data centres.

# Climate change and the need for efficient, sustainable buildings

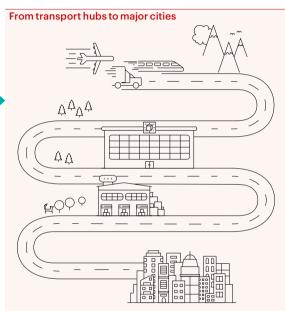

- Increased focus on the impact of buildings on the environment and the use of finite natural resources.
- Our customers are also looking to minimise their own footprints and reduce overall occupancy costs.
- Buildings need to be sustainable in the long term and use natural resources efficiently.

# Complementary asset types

#### Big box warehouses: 32%

- Typically larger units serving national and international logistics supply chains, mainly bulk storage and distribution
- Higher net income yield
- Low management
- Development mainly pre-let
- Moderate availability
- Expected ERV growth of 2-3% p.a.

Portfolio by type (valuation, SEGRO share)

Urban warehouse UK	52%
Urban warehouse CE	14%
Big box warehouse UK	10%
Big box warehouse CE	22%
Other	2%

#### Urban warehouses: 66%

- Typically smaller units
- Flexible warehouse space to cater for multiple uses, including urban distribution and data centres
- Lower net income yields
- Greater asset management potential
- Development mainly speculative
- Limited availability
- Expected ERV growth of 3-6% p.a.

# Growth opportunities from the capture of reversion and development

# Strong income potential

Embedded in the way that we manage our business day-today are our Responsible SEGRO strategic priorities. They influence the way we manage our portfolio, how we create new space, and the investments that we make into our business to make sure that it is fit for the future.

Our Responsible SEGRO framework focuses on three long-term priorities to which we believe we can make the greatest business, environment and social contribution. For each of these areas we have established challenging targets that are linked to six non-financial KPIs and to the annual bonus for all employees. We report on our progress annually, and we will set additional, more specific, supporting targets as necessary and we expect our actions and approach to evolve over time to reflect our achievements, technological change and the priorities of our stakeholders and wider society.

#### Our three long-term priorities

**Championing low-carbon growth** We will be net-zero carbon by 2030

# Investing in our local communities and environments

We will create and implement Community Investment Plans (CIPs) for every key market in our portfolio by 2025 (first ten CIPs launched in 2022)

#### Nurturing talent

We will increase the overall diversity of our own workforce throughout the organisation
