A GREENER

SUPPLY CHAIN

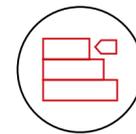

152,000 kWh
of generated electricity per year

The new sustainable measures at SEGRO Centre Dagenham are designed to lower operational costs while supporting the wellbeing of your workforce.

The newly installed photovoltaic panels have the potential to generate 152,000 kWh* of electricity annually, offering potential savings of up to £36,480 per year.

The unit is also highly energy efficient, having achieved EPC rating 'A+' and BREEAM 'Outstanding'. This signifies our exceptional commitment to sustainability, exceeding regulatory standards through innovative design and technology.

*This estimate is based on a fully delivered electricity cost of 24p per kWh and the PV manufacturer's projected maximum energy generation per annum. Actual savings may vary depending on facility usage and system performance.

EPC rating 'A+'

Photovoltaic panels on the roof generating renewable energy for occupiers

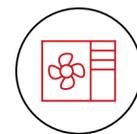

BREEAM 'Outstanding'

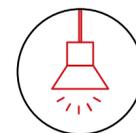

Rainwater harvesting & installing water efficient appliances

Electric car charging

Air source heat pump, providing comfort heating and cooling

High efficiency LED lighting internally and externally
